

ECO-REFORM

Eco-Reform is TYCIA Foundation's flagship climate-resilience programme transforming prisons into climate-adaptive, sustainable and rehabilitative spaces.

The programme takes a 30-step approach to identify and address the overall systemic and geographical challenges faced by prisons, with the aim of creating practical and sustainable solutions.

We have started this approach with a North Indian prison Nuh District Jail, Haryana focusing on practical solutions for heat, water, waste, infrastructure and environmental resilience, with the aim of developing a model that can be replicated across India.

ECO-REFORM AT NUH DISTRICT JAIL

- 2,069 M^2 LAND DEVELOPED
- 1 COMPOSTING UNIT
- 20 RAISED CULTIVATION BEDS
- 120 INMATES TRAINED
- 160 WATER TANKS PROTECTED
- 9 PRISON STAFF ENGAGED
- 13% ESTIMATED REDUCTION IN WATER EVAPORATION
- 6 TECHNICAL TRAINERS

ECO-REFORM

TOWARDS CLIMATE-RESILIENT ADAPTIVE PRISONS : PRIORITISING PRISONER WELLBEING

Towards Climate-Resilient Adaptive Prisons • Prioritising Prisoner Wellbeing

TURN YOUR CONCERN INTO ACTION

TYCIA

WHY CLIMATE-ADAPTIVE PRISONS?

Prisons can be particularly vulnerable to climate-related risks because of their enclosed infrastructure, high population density and limited access to adaptive resources.

KEY CHALLENGES INCLUDE:

These challenges shape everyday living conditions, access to basic needs, and overall wellbeing.

- EXTREME HEAT
- WATER & ACCESS
- POOR INFRASTRUCTURE
- WASTE MANAGEMENT
- FOOD & GREEN SPACES
- CHANGING WEATHER PATTERNS

OUR FOCUS AREAS
5 CATEGORIES • 30 ACTIONS FOR CLIMATE-RESILIENT PRISONS

CLIMATE-RESILIENT INFRASTRUCTURE
- Improving prison infrastructure to better respond to extreme heat, changing weather conditions and other climate risks.

WATER CONSERVATION
- Promoting efficient water use, improved storage and practical water-conservation solutions.

WASTE MANAGEMENT
- Encouraging waste segregation, composting, recycling and sustainable waste-management practices.

SUSTAINABLE & GREEN PRACTICES
- Promoting kitchen gardens, green spaces, sustainable food practices and environmentally responsible operations.

EDUCATION & ENGAGEMENT
- Building climate awareness and encouraging participation of prison staff and incarcerated individuals in sustainability initiatives.

OUR APPROACH

Eco-Reform follows a **research-to-action approach**, working with prison administrations, prison staff, incarcerated individuals and other stakeholders to identify challenges and develop practical solutions.

RESEARCH & ASSESSMENT
Assessing climate risks, vulnerabilities and infrastructure gaps in prisons.

CLIMATE-RESILIENT INTERVENTIONS
Developing practical, need-based solutions for climate resilience.

EDUCATION & CAPACITY BUILDING
Building climate awareness, skills and environmental responsibility.

ADVOCACY FOR GREEN PRISONS
Promoting institutional adoption of sustainable prison practices.
